## Laredo & Webb County Area MPO FY 2023-2026 TIP Analysis

# I. BACKGROUND

Moving Ahead for Progress in the 21<sup>st</sup> Century (MAP-21) introduced a set of performance measures to increase the accountability and transparency of federal highway and transit programs, and improve project decision-making through performance-based planning and programming. The Fixing America's Surface Transportation (FAST) Act continues the use of performance measures and targets at the national, state, and local level. The Federal Highway Administration (FHWA) defines Transportation Performance Management (TPM) as a strategic approach that uses system information to make investment and policy decisions to achieve national performance goals.

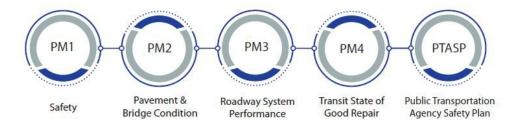

State Departments of Transportation (State DOTs) and Metropolitan Planning Organizations (MPO's) are required to set Highway Safety Improvement Program (HSIP) targets to meet safety performance measures. Said safety measures are a component of the Safety Performance Measures (Safety PM) that support HSIP and provide both State DOTs and MPOs with the framework to implement TPM requirements, i.e., provide directional goals for related plans and programs as wells as the means to monitor the progress of attaining federal goals.

MPOs, within Texas, may establish HSIP targets by either:

- Agreeing to adopt the targets set by the Texas Department of Transportation (TxDOT) Or
- 2. Set their own specific HSIP targets

The Laredo & Webb County Area MPO (LWCAMPO) opted to adopt the HSIP targets set by TxDOT and thus, have incorporated said targets into the programming and planning process of the Metropolitan Transportation Plan (MTP) as well as the Transportation Improvement Program (TIP). This includes supporting the state's Road to Zero to further identify and fund safety projects and meet TxDOT's goal of reducing fatal crashes in half by 2035, and ending all fatalities on Texas roads by 2050.

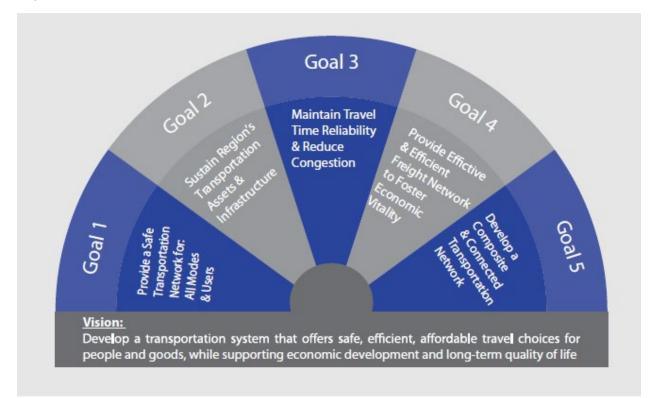

If the process of implementing performance measures requires additions or changes to the MTP and TIP, the documents will be amended in the future. The adopted targets include the following key areas:

### II. Transportation Performance Measures & the 2020-2045 MTP

To support the regional vision, the 2020-2045 MTP includes a series of goals and objectives that are based on policy guidance and community priorities collected during the October 2018 public meetings. Said

goals and objectives are aligned with state plans, federal guidelines, and are compliant with the requirements of the FAST Act.

Due to the extensive scope and time horizon of the MTP, the development and implementation of performance measures for MPOs serves as a means to assess how the transportation system is functioning and operating. Performance measures can inform the decision-making process and improve accountability for the efficient and effective implementation of programs and projects. Performance measures serve the following functions for the LWCAMPO:

- During the **Plan Development** process, performance measures provide a framework to benchmark performance and the effects of alternatives. This performance data is used to define transportation projects and can help inform decision-making between trade-offs and help communicate the anticipated impacts of different investment strategies.
- Performance measures support **Plan Implementation** by emphasizing the Laredo MPO guiding principles and integrating them into budgeting, program structure, project selection, and implementation policies.
- System performance relative to the vision and guiding principles of the Laredo MTP can be tracked and reported to support **Accountability** for plan implementation and results.

#### III. FY 2023-2026 LWCAMPO TIP ANALYSIS

As per federal law, LWCAMPO staff have reviewed projects in the TIP for compliance with the aforementioned performance measures. Likewise, staff will review any amendments made to the TIP to

determine their relevance in the advancement of goals and objections of the aforementioned performance measures.

Short Range Projects & Related PM Listed in the TIP

LWCAMPO has developed a TIP that contains projects that are consistent with MTP, i.e. reflects the current MTP's established investment priorities, and is designed towards achieving the established performance targets. The following tables provide a summary of the short-range projects, listed in the current TIP, & their respective contribution towards meeting the adopted performance measures.

		_	Lim	nits		DIAD					
	CSJ	Project	From	То	PM1	PM2	РМЗ	PM4	PTASP	Comments	
	FY 2023										
1	0922-33-166	Reuthinger Road	0.1 mi E of Beltway Pkwy	IH-35 W Frontage Rd						New divided highway will help relief congestion from FM 1472 by providing an alternative route to I-35.	
2	0922-33-165	Hachar Roadway Road	FM 1472	0.100 mi E of BLTWY Pkwy						New divided highway will help congestion from FM 1472 by providing an alternative route to I-35.	
3	0922-33-181	Improvement of 17 Bus Stops	Various L	ocations						Project sponsor will not be proceeding with project. Project to be removed in future amendment.	
4	0086-01-073	SH 359 Widening	4.06 mi E of SL 20	8.935 mi E of SL 20						Widening of roadway from 3 lanes to 5 lanes. Project includes widening of center turn lane and shoulders. Improvements will support travel time reliability and operational safety.	
5	0086-02-023	SH 359 Widening	8.935 mi E of SL 20	9.830 mi E of SL 20	•					Widening of roadway from 2 lanes to 4 lane divided highway will improve safety & travel time reliability.	
6	0086-14-088	US 59 (Loop 20) Reconstruction	0.36 mi S of University Blvd	0.51 mi S of Shiloh Dr.						Reconstruction of existing 6-lane divided highway to a 6-lane freeway facility with 3-lane frontage roads will improve safety. Safety improvements include installation of 14 ft. dual-use path on east side and 3 ft. tall center traffic barrier.	
7	0086-14-076	US 59 (Loop 20) Interchange at Shiloh Dr.	0.50 mi S of Shiloh Dr.	0.50 mi N of Shiloh Dr.						Construction of interchange improves safety and supports travel time reliability.	
8	0086-14-089	US 59 (Loop 20) Reconstruction	0.51 mi S of Shiloh	International Blvd.						Reconstruction of existing 6-lane divided highway to a 6-lane freeway facility with 3-lane frontage roads will improve safety. Safety improvements include installation of 14 ft. dual-use path on east side and 3 ft. tall center traffic barrier.	
9	0086-14-079	US 59 (Loop 20) Interchange at University Blvd.	0.50 mi S of University Blvd.	0.50 mi N of University Blvd.						Construction of interchange improves safety near university and supports travel time reliability by reducing existing conflict point.	
10	0086-14-075	US 59 (Loop 20) Interchange at Del Mar	0.50 mi S of Del Mar Blvd.	0.50 mi N of Del Mar Blvd.						Construction of interchange improves safety and supports travel time reliability.	
11	0922-33-177	River Vega Trail	Anna Park	LCC Campus						Construction of new off-street bicycle & pedestrian trail enhances safety.

	FY 2026									
1	0019-06-195	New Direct Connector (#3) south of IH35 to east I-69W		0.5 mi N of US59						New Direct Connector northbound and southbound IH35 to east I-69W will improve safety and travel time reliability.

#### PTASP Safety Performance for El Metro by Mode of Service

The PTASP Final Rule, 49 CFR Part 673.11(a)(3), requires that all public transportation providers must develop an Agency Safety Plan to include safety performance targets (SPTs) based on the safety performance measures established under the National Public Transportation Safety Plan (NSP). The safety performance measures outlined in the NSP were developed to ensure that the measures can be applied to all modes of public transportation and are based on data currently being submitted to the National Transit Database. The safety performance measures included in the NSP are fatalities, injuries, safety events, and system reliability (State of Good Repair as developed and tracked in the TAM Plan). As per the current PTASP, El Metro has met the following STPs in the 2021 Calendar Year:

2021 Calender Year								
Fixed Route	Demand Response							
𝞯 Total Number of Fatalities	♂ Total Number of Fatalities							
<ul> <li>Total Number of Major Mechanical Failures</li> <li>System Reliability (failures/VRM)</li> </ul>	<ul> <li>Total Number of Injuries</li> <li>Total Number of Safety Events</li> <li>Total Number of Major Mechanical Failures</li> <li>System Reliability (failures/VRM)</li> </ul>							

The FY 2023-2026 programmed a total of \$69,929,560 (federal and local match) for transit projects. Programmed funding includes: \$67,322,820 in FTA 5307 formula funding to be used for assistance of El Metro Transit bus operations and maintenance; \$1,793,952 in FTA 5339 formula funding to be used for replacing heavy-duty buses and paratransit vans, and bus facility improvements; and FTA 5310 formula funding to be used for capital investments and operation assistance to improve mobility for seniors and individuals with disabilities by removing barriers to transportation service and expanding mobility options.
